The 1st

Visualization Workshop

2022 / August 19th (Fri.)

B1F Auditorium

統計科學研究所 演講廳

線上/實體同步

**Institute Of Statistical Science,
Academia Sinica, Taiwan**

Visualization, transforming data into pictures for storytelling or discovery, as a discipline has quickly grown its importance in data-driven scientific studies, engineering designs, and business operations. This workshop aims to bring together visualization researchers, practitioners, and users of visualization in Taiwan and initiate a dialogue between them. Together, the workshop attendees will learn about existing visualization R&D activities, challenging data visualization and analytics problems, emerging application areas, research opportunities, etc. The workshop will be composed of invited talks and a panel discussion.

Workshop Co-Chairs

Chun-houh Chen
